Summary

Driven final-year Electronics and Communication Engineering student with a strong foundation in programming (Python), SQL integration. Skilled in data structures, object-oriented programming, and efficient debugging, with practical experience building software solutions. Eager to leverage technical expertise and analytical problem-solving abilities to contribute as a software developer.

Education

B.E. – Electronics and Communication Engineering	2022 - 2026
Sri Shakthi Institute of Engineering and Technology	8.02 CGPA
HSC	2022
Amrita Vidyalayam , Ettimadai	74%
SSLC	2020
Noyyal Public School	84%

Skills

Python JavaScript React.js HTML/CSS Django Django REST Framework MySQL Git/GitHub

SQLite VSCode DBMSBasics OOP DataStructures ProblemSolving TimeManagement

Projects

Nectar - Virtual Herbal Garden

Built a full-stack web application using React and Django REST Framework, implementing JWT-based authentication and Role-Based Access Control (RBAC). Developed RESTful APIs to manage plant data with features like search, filtering, and structured retrieval. Integrated user functionalities such as bookmarks and notes, along with an admin dashboard for efficient data management and CRUD operations.

Tech Stack: React, Django, Django REST Framework, SQLite, HTML, CSS, JavaScript | Development Tools: VS Code, Git, GitHub

Roomly - A Peer Driven Learning Discussion Rooms

Roomly is a Django-based web application built using Python, Django ORM, SQLite, and HTML/CSS. It implements user authentication, relational database models, CRUD operations, URL routing, template rendering, and form handling to enable real-time study room management.

Tech Stack: Django , SQLite, HTML, CSS, | Development Tools: VS Code

[Roomly - GitHub Link](#)

Craft Connect - Console-Based E-Commerce Platform

Built a console-based app with buyer and seller roles .Sellers can manage products, while buyers can browse and add to car . Used Python classes and MySQL for backend operations with secure login and role-based menus.

Tech Stack: Python | Development Tools: VS Code

[Craft Connect - GitHub Link](#)

Internships

Python Programming Intern

Completed a 1-month hands-on Python internship focused on OOP, and real-world coding practices

Robo Miracle – Robotics Training Program

Controlled motor directions using Python programming during a robotics internship with hands-on hardware integration

Achivements

1. Pre Finalist - Smart India Hackathon 2.100+ PRoblems on Leetcode
